352

SICs ▲ +100 YoY

Agents grew up at Dreamforce — from demo to production.

For CBS, the value landed in three places: the field, the long service cycle, and work that runs itself.

THE SIX — RANKED BY CBS RELEVANCE

01

Agentforce Voice — Field Voice

GA NOW

WHAT IT IS

Hands-free voice agent inside the Salesforce mobile app.

WHY CBS CARES

Techs get a **spoken job briefing before they arrive** — account, case and site history — then **dictate notes, status and follow-ups** on the way out. No laptop, no typing, no end-of-day catch-up.

BEST FOR HVAC · Roofing · Electrical · Plumbing · Field engineering

02

Alforce — Salesforce on Any Surface

COWORKER GA · SLACKFORCE OCT

WHAT IT IS

Salesforce data, workflows and permissions available inside Claude, Slack or plain language — no Salesforce UI required.

WHY CBS CARES

Billable teams stop navigating CRM. Pull account context, **draft the proposal, log the site visit** from where they already work. Your permissions still apply.

BEST FOR Legal · Consulting · Accounting · Any Slack-first firm

03

Long-Horizon Agents

PILOT · GA NOV '26

WHAT IT IS

A new kind of agent that pursues one goal over days, weeks or months — with memory, self-correction and your approval gates.

WHY CBS CARES

Service contracts and proposals don't close in a day. Hand off **"re-engage every expiring maintenance agreement"** and let it work the list for six weeks, checking in on your terms.

BEST FOR Recurring service contracts · Long proposal cycles · Renewals

THE SIX — CONTINUED

04

Job-Ready Agents — Fin & Hunter

FIN GA · HUNTER NOV

WHAT IT IS

Pre-built agents that already know the job. **Fin** resolves service end-to-end across chat, email, WhatsApp, SMS and voice. **Hunter** runs outbound and revives stalled pipeline.

WHY CBS CARES

Skips the build phase entirely. Fulton Bank had an agent live in **one hour** and re-engaged **\$340K of at-risk pipeline** — 3,000 employees on it within six weeks.

BEST FOR High inbound service volume · Lean teams with no AI build budget

05

Koa — Our Own CRM Reasoning Model

PILOT · GA WINTER '26

WHAT IT IS

The first reasoning model purpose-built for CRM work, developed with NVIDIA. Trained only on synthetic scenarios — **zero customer data**, weights owned and run by Salesforce.

WHY CBS CARES

This is the answer to “**why not just use a general-purpose model?**” Purpose-trained on real service and sales workflows, and it never leaves our trust boundary.

06

Data 360

GA NOW

WHAT IT IS

One real-time, unified customer record — built for people and agents alike.

WHY CBS CARES

Every agent above is only as smart as the context behind it — **job history, contracts, site data and billing in one place**. This was the loudest topic in CBS channels coming out of Dreamforce. Lead with it.

BEST FOR The foundation deal — start here, then layer agents on top

WHO TO BRING IT TO

	FIELD VOICE	AI-FORCE	LONG-HORIZON	FIN & HUNTER	KOA	DATA 360

YOUR NEXT MOVE

DFX follow-up runs through October 30 — 100% coverage on every account that attended or streamed DF.

Lead with Data 360, then the agent that matches their business. Deeper material: the CBS Post-DF Recap and the Architect “DF Cool Stuff Report” are both posted in #cbs-solutions.
